

## optibelt ALPHA linear-F

Optibelt ALPHA linear-F flat belts are extruded, open-ended polyurethane flat belts with steel tension cords parallel to the belt edges.

### Advantages

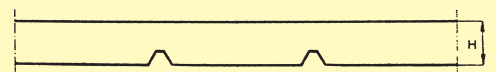

- High levels of tension can be transferred
- Fabric coating is possible on the key side
- Manufactured as tension belts
- For drives without synchronous drive transmission
- Standard roll length of 50 m
- Lengths of over 100,000 mm are also possible
- Pulleys on request

### Standard Range; Section, Width:

for Optibelt ALPHA linear – F

25 F2-St	25 F3-St
30 F2-St	30 F3-St
50 F2-St	50 F3-St
75 F2-St	75 F3-St
100 F2-St	100 F3-St

Height (mm) H

- Tension belts
- Fitness appliances
- Applications without synchronous power transmission
