

optibelt SK S=C PLUS*

The wrapped Optibelt SK wedge belt has been developed with mechanical engineering in mind. It transmits substantially more power than the classical V-belt with comparable top width, e.g. section SPB and section B/17. The wrapped wedge belt has the famous Optibelt S=C PLUS attributes with an efficiency of approx. 97 % and is suitable for use in sets without additional measurement.

Advantages

- Wrapped wedge belts according to DIN/ISO/BS
- Extremely high performance
- Compact, space-saving shape
- High belt speed
- Superior price/performance ratio
- Low maintenance costs
- S=C PLUS Set Constant, can be used in sets without further measurement

- 1 Filler rubber
2 Tension cord
3 Base rubber
4 Impregnated cover fabric

The Optibelt SK high performance wedge belt is preferred for use in heavy mechanical engineering with very high load requirements, which can be over 2000 kW.

Examples of Applications

Heavy mechanical engineering

Crushers

Plastics machinery

Extruders

Compressors

Screw compressors

Textile machinery

Weaving looms

Ventilators

Axial blowers

Pumps

Rotary centrifugal pumps

Printing machinery

Rotary printing presses

Construction machinery

Plate compactors, mixers

Sections:

SPZ; SPA; SPB; SPC;
3V/9N; 5V/15N; 8V/25N

Dimensions:

487 to 12 500 mm
standard range
further sizes on request

V-grooved pulleys:

all standard pulleys
special pulleys on request

***S=C PLUS** can be used in sets without further measurement

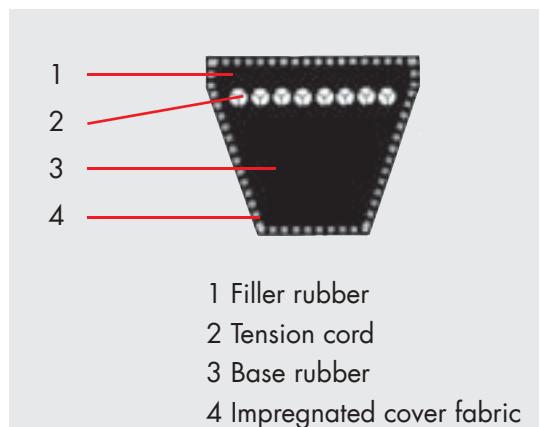

optibelt SK S=C PLUS*

For use in machines built to USA standards, Optibelt offers perfectly coordinated solutions. A wide spectrum of drives is covered by the three standardised sections. The 3V/9N and 5V/15N sections can also be used in the DIN/ISO/BS pulley grooves SPZ/Z/10 and SPB/B/17.

Advantages

- Dimensions to USA standards
- Extremely high performance
- Compact, space-saving shape
- Efficient price/performance ratio
- Low maintenance costs

Due to the strict production tolerances, the Optibelt SK S=C PLUS can be used in sets according to USA standards without having to be checked and is best suited to heavy duty drives.

Examples of Applications

Heavy mechanical engineering	Crushers
Construction machinery	Plate compactors, mixers
Printing machinery	Rotary printing presses
Plastics machinery	Extruders
Compressors	Screw compressors
Textile machinery	Weaving looms
Ventilators	Axial blowers
Pumps	Rotary centrifugal pumps

***S=C PLUS** can be used in sets without further measurement

Sections:

3V/9N; 5V/15N; 8V/25N

Dimensions:

635 to 12700 mm
standard range
further sizes on request

V-grooved pulleys:

all standard pulleys
special pulleys on request
